

A PRODUCT OF AUTOMATED PACKAGING SYSTEMS

Introducing the Autobag® 850S™ Mail Order Fulfillment System – The widest, and most technologically-advanced system for mail order fulfillment bagging

The new Autobag® 850S™ bagger is uniquely designed to provide enhanced packaging productivity for mail order fulfillment applications. Capable of running bags up to 22" wide, this system is ideal for packing medium to large products such as apparel, nutraceuticals/pharmaceuticals, shoes, sporting goods, fashion accessories, and more.

The Autobag 850S Mail Order Fulfillment System features a breakthrough bag opening technology that securely grips and holds the open bag in place. This creates a large, square opening (up to 11" x 11") that allows for easy loading of single or multi-line orders. This arrangement also facilitates the use of a smaller and more completely filled bag, maximizing return on investment. A coordinated motion seal flattening system provides a consistent, wrinkle-free seal.

Next-bag-out printing is achieved with an advanced thermal transfer imprinter positioned directly over the next bag to be loaded. This ensures accuracy and efficiency in fulfillment applications that require frequent product and label changeovers, and prevents product queuing.

The Autobag 850S utilizes a sophisticated tension control unit that centers and monitors the position of the film throughout the entire bagging process. A modular bag storage shelf and simplified threading process speed changeover and reduce waste.

State-of-the-art engineering has resulted in a system that is inherently safe. The Autobag 850S eliminates the need for bulky guarding or devices required for safe operation. This unobstructed access makes loading ergonomic and improves operator throughput. A programmable pass-through allows loading of products up to 11" wide.

When used with genuine Autobag pre-opened bags, the Autobag 850S ushers in the next evolution of high-quality, reliable and flexible mail order fulfillment packaging, backed by the industry's most comprehensive engineering and field service network.

User Benefits

- Capable of running bags up to 22" wide – the industry's widest
- Advanced bag opening system minimizes bag size and facilitates multi-line orders
- Inherently safe design minimizes guarding for easy access to the open bag
- Simple bag threading for easy changeover
- Coordinated seal flattener for wrinkle free seals
- Prints the next bag out — no product to queue
- Compact footprint minimizes floor space
- Easily integrates with third-party systems

Typical Applications

- Single or multi-line mail order fulfillment
- Apparel
- Prescription-by-mail fulfillment
- Fashion Accessories
- Footwear

Options

- Takeaway conveyor (Rear or side exit)

Technical Specifications

Weight:	590 lbs
Electrical:	110/220 VAC switchable 50/60 Hz, 1,800 watts continuous
Air Feed:	5 CFM/80 psi of clean, dry air
Dimensions:	35 inch width, 72.2 inch length, height is adjustable from 43.5 inches to 55.5 inches
Bag Size:	W 10 to 22 in. L 10 to 36 in.

Standard Features

- Programmable pass-through up to 11" for maximum flexibility
- Simple height adjustment and casters for operator comfort and portability
- AutoTouch™ Control Screen accesses operator tutorials, help system, on-board diagnostics, data retrieval, and performance monitoring
