

## The AirPouch® Express 3™ Void-fill System – Versatility, lower shipping costs, and improved productivity in a compact, tabletop unit

The AirPouch® Express 3™ Void-fill System provides on-demand, easy-to-use air pillows for high packing productivity, reduced shipping costs, and increased customer satisfaction. Weighing in at just 15kg, this compact, all-electric system features operator-friendly controls and virtually maintenance-free operation. Simply plug the unit in, load the air pillow material, and start packing.

The AirPouch Express 3 also offers a wide variety of accessories and integrated system configurations for optimum productivity in each unique application. Basic accessories can be added to the Express 3 to create a simple, stand-alone packing station, or the system can be integrated into existing high-productivity, multi-station order fulfillment operations.

The Express 3 is the **first pre-formed pillow system to offer knifeless operation**, eliminating the primary wear item found on most other machines in its class. Instead, AirPouch air pillows use a patented perforation that automatically separates for filling, then re-seals as it passes through the machine – without compromising speed or seal integrity. AirPouch pillows also feature our exclusive EZ-Tear™ Perforations that are preferred for their easy handling and effortless pillow separation.

AirPouch void-fill air pillows are available in a variety of material types, including GeoTech® Oxodegradable and Reprocessed films. These pillows offer superior seals and puncture resistance for durability and reliable air retention.

System-matched for optimum performance on the Express 3 system, AirPouch void-fill air pillows are available in a range of lengths, and thicknesses to suit any void-fill application requirement.

### Markets Served

All void-fill applications, including:

- Mail Order Fulfillment
- Pharmaceutical Fulfillment
- Third Party Logistics
- Contract Packing

Operator friendly controls for easy set-up and operation

Compact design for easy pack station integration

Knifeless design eliminates primary wear item found on other void-fill air pillow machines

High-yield, boxed material requires less lifting and fewer changeovers

## Features and Benefits

### On Demand Pillows

Provides air pillows on demand for fast, easy packing in semi- or fully-automatic modes

### Fast

Tabletop system produces air pillows at speeds over 15 metres per minute

### All Electric

All-electric design does not require compressed air to operate

### Reduce Costs

Better air retention and improved yield reduce cost per cubic metre

### Dust-Free

Dust-free air pillows are cleaner to use than poly chips and paper

### Reduce Storage Space

High-yield, boxed material reduces storage and transport requirements

### EZ-Tear Perforations

EZ-Tear Perforations are packer-friendly and designed for improved efficiency and ergonomics

### Oxodegradable & Reprocessed

The AirPouch Express 3 uses GeoTech Oxodegradable and Reprocessed film

### Diagnostics

Monitor usage and conduct diagnostics through an onboard connectivity port

## Optional Additions

- Machine Stand
- Storage Hoppers
- Automatic Product Level Sensors
- Dispenser Attachments
- Footswitch
- Compact Overhead Hopper and Stand
- Custom engineered solutions for unique packing station requirements

## Technical Information

520mm Length x 220mm Width

Weight	15kg
Electrical	100/240 VAC; 50/60 Hz; 7/3.5 FLA
Pillow Sizes	200mm wide in various standard lengths

**System Matched Materials**

**Service & Support**

**Custom Engineering & Integration**
