Backing plastic flanges used in pipeline glass construction consist of one-piece unit suitable for operating temperature of up 200°C on the product side and for the full range of operating pressures.

Soffieria Sestese produces two types of backing flanges, our standard SSCH type and conical SRCP type.

1. SSCH Standard Backing Plastic Flanges Type

This type of backing flange is the most widely used as it has optimum resistance to corrosion is lightweight and it is able to dissipated electrostatic charges.

SBEIL insert for backing plastic flange, must be required separately.

2. Conical SRCP Backing Plastic Flanges Type

This type of backing flange has optimum resistance to corrosion, it is able to dissipated electrostatic charges and it is lightweight.

SCIP insert for backing plastic flange, must be required separately.

SSCH STANDARD BACKING / SPECIFICATIONS

DN	EXTERNAL DIAMETER	HOLE CENTRES	NO. HOLES & DIAMETER	THICKNESS	CODE
15	64	50	3×Ø7.0	13	SSCHE015/K
25	105	85	4×Ø9.5	17	SSCHD025/K
40	132	110	4×Ø9.5	20	SSCHD040/K
50	147	125	4×Ø9.5	24	SSCHD050/K
80	184	160	8×Ø9.5	28	SSCHD080/K
100	204	180	8×Ø9.5	28	SSCHD100/K
150	265	240	8×Ø9.5	34	SSCHD150/K
200	321	295	8×Ø9.5	34	SSCHD200/K
300	428	400	12×Ø9.5	35	SSCHD300/K

CONICAL SRCP BACKING / SPECIFICATIONS

DN	EXTERNAL DIAMETER	HOLE CENTRES	NO. HOLES & DIAMETER	THICKNESS	CODE
15	70	50	3×Ø7	11	SRCP015
25	90	70	3×Ø9	16	SRCP025
